Airway management is a critical skill for healthcare professionals. It is the ability to maintain a patient's airway, which is the passage of air between the lungs and the outside world. Airway management can be necessary in a variety of situations, including:

- Cardiac arrest
- Respiratory arrest
- Trauma
- Overdose
- Aspiration
- Anaphylaxis

Airway management can be performed using a variety of techniques, including:

- Orotracheal intubation
- Nasotracheal intubation
- Laryngeal mask airway
- Esophageal-tracheal Combitube
- Surgical airway

The choice of airway management technique depends on a number of factors, including the patient's condition, the available equipment, and the healthcare professional's skill level. Airway management is a complex and challenging skill. However, it is an essential skill for healthcare professionals who want to be able to provide life-saving care.

Airway Management Equipment

A variety of airway management equipment is available, including:

- Laryngoscope
- Endotracheal tube
- Laryngeal mask airway
- Esophageal-tracheal Combitube
- Surgical airway

The choice of airway management equipment depends on a number of factors, including the patient's condition, the available equipment, and the

healthcare professional's skill level.

- Nasotracheal intubation
- Laryngeal mask airway
- Esophageal-tracheal Combitube
- Surgical airway

The choice of airway management technique depends on a number of factors, including the patient's condition, the available equipment, and the healthcare professional's skill level.

Airway Management Complications

Airway management can be associated with a number of complications, including:

- Aspiration
- Trauma
- Infection
- Death

The risk of complications is increased in patients who are critically ill, have a difficult airway, or are receiving multiple airway management attempts.

Airway management is a complex and challenging skill. However, it is an essential skill for healthcare professionals who want to be able to provide life-saving care.
